## CAREER RESOURCES

Innovative Career Resources earns the prestigious 2017 “Best of Staffing” Award for the fourth year in a row!

Tustin, CA – March 10, 2017--- Orange County’s own Innovative Career Resources

(Innovative) announced today that it has been awarded Inavero’s and Career Builder’s 2017 Best of Staffing Award for Talent (Contract Employees) & Client Satisfaction for the fourth year running! Best of Staffing (<http://bit.ly/1SgKRYJ0>) is the nation’s only award recognizing less than 2% of staffing and recruiting agencies in North America to include Canada that receive remarkable reviews from their clients and contracted employees.

Focused on helping connect people with the right job openings and quality talent, Innovative achieved a Lifetime Average score of over 76.2% -- meaning that over 76.2% of their clients rated them either a 9 or 10 (out of a possible 10) compared to 67% at other staffing agencies. From their permanent and temporary employees, Innovative achieved a Lifetime Average score of over 71%, also receiving ratings of 9 or 10 (out of a possible 10) over the 66% at other staffing agencies.

Innovative is Southern California’s leader in talent acquisition and recruiting for IT, Science, Engineering, Finance, Healthcare and Accounting services in the greater Orange County, Los Angeles, Riverside and San Bernardino counties. At the core of their award-winning success is Innovative’s personalized approach to customer service.

The team maintains personal, consistent contact with over 150 clients and contractors, ensuring that every person they serve is completely satisfied with their staffing solution and career paths provided. Clients and professional contractors have full and direct access to the owners and staff of Innovative at all times, ensuring quality relationships are cultivated and maintained.

Companies like Innovative Career Resources continue to play an increasingly important role with organizations and companies in various leading industries filling new positions in a booming job market.

“When we started in 2002, we positioned ourselves to truly stand out from other staffing companies,” stated Keith Fiscus, CEO and Co-Founder of Innovative Career Resources. “We focused on niche industries that we knew we could truly affect, more specifically focusing on developing a Customer Service driven organization where people matter, rather than just treating them as a time-card or a billable commodity....”

A representative from an Innovative Career Resources client stated: “Innovative works to understand my needs when I am seeking a technical resource. They have consistently provided several strong applicants for each posting so I am able to choose the best candidate for the role. The candidates we chose to hire from Innovative have been solid team players with good technical capabilities to meet our needs.”
